Dear BLM,

I am writing to voice my firm belief that drilling in ANWR is a misguided proposal. I oppose any drilling in ANWR. I have been there multiple times and this area deserves full protection as one of the last places on earth that supports this magnitude of wildlife and important habitat. To destroy it for a relatively short term gain compared to the long term loss of this wild habitat is wrong.

This plan is being rushed through by this administration. The time needs to be allotted for an EIS that is thoroughly researched and there must be a "No Drill" alternative in the options. We are relying on you to make sure there is clear scientific documentation on all aspects of ANWR, including its intrinsic value as wilderness.

Thank you for your hard work.

Sincerely,

Diane Calamar Okonek
