To Whom It May Concern,

It has been brought to my attention that there is a review period regarding the intent to lease oil and gas from the Arctic National Wildlife Refuge. I ask that these plans be halted, as the refuge is an important piece of land for wildlife. The wilderness, the wildlife that resides on it, and resources should not be compromised for oil activities.

Oil and gas leasing could contribute to climate change, and there are already problems in the Arctic with rising temperatures.

I ask that you halt the plan to lease oil and gas in the Refuge and instead look towards green energy as that is the way of the future.

Thank you for your time.

Chelsea Berg
