Dear Public Officials,

Please do not allow any petroleum products drilling, exploration or any extractive mining in our Arctic National Wildlife Refuge. Public opinion is strongly against this. Our few remaining wild public lands should not be subject to the economic whims of a single Senator whose state has not prepared for their change in finances. That is just not right to sneak a rider into a large national bill, holding the whole process hostage to one senator. All citizens own our public lands. We should all have a voice in protecting them.

Dr. Martha S. Bibb
