Oh Thank you so much for ending the protection of so much in Alaska. Although I do not understand why, I imagine the greedy nature of those who should be guarding our most precious commodities, i.e., animals, native people and money, don't understand their most sacred tasks. Please, use up all theresources of the world and our country, to line the pockets of the few, so they have the money to leave this planet when they finish killing it off

May your progeny learn the truth and know how you looked out for them and left them everything. Ha, foolish greed will be a very difficult mantle to bear.
