Dear BLM Coastal Plain,

The drilling law in ANWR BREACHES various agreements, including the original intent of the Alaska National Interest Lands Conservation Act, the agreement between the government of Canada and the government of the USA on the conservation of the porcupine caribou herd, the UN's Declaration on the Rights of Indigenous Peoples, NEPA's intent (by not having a "no action" alternative for the coastal plain EIS), Alaska's Statute on Subsistence, and a call for a national security analysis.

This is the tip of the iceberg. The scientific evidence concerning global warming from numerous studies says to leave fossil fuels in the ground.
