To whom it may concern,

Our family wants to state that we are totally opposed to opening the Wildlife Refuge to potential destruction by allowing drilling.

The endless greed of the supporters of this idea will just destroy one of the last pristine areas currently saved from such an plan. Once gone it cannot be repaired. The certain construction damage, oil leaks, environmental havoc in this animal breeding area is insane and being done for no reason that benefits our nation, just the rapacious oil companies. We are already self sufficient in oil. This is about nothing but boundless greed at the expense of all else. **STOP THIS INSANE IDEA!**
