To Whom It May Concern,

Please register my email regarding BLM's Coastal Plain Leasing EIS in the Alaska National Wildlife Refuge.

In my view, this project makes no sense from an economic, social and environmental perspective. We know too much already about the negative side effects of such drilling and, once we do it there, the damages will be irreversible. From an economic perspective this makes no sense either. This is an entirely symbolic move that is unnecessary and potentially seriously damaging to a true national treasure.

Thanks for your consideration,

Ben Packard
