Dear Sirs or Madam,

I do not support any drilling for fossil fuels in the arctic, wildlife preserves or national or state parks. The Trump administration and Mr. Pruitt have effectively gutted the EPA. It is 2018, the fact of the matter, is global warming is real, Exxon knew it long ago, but hid it, and fossil fuels are the way of the past. The United States must embrace the future, including renewables in order to remain global relevant. The short term gains of increased drilling efforts are not worth the long term side effects.

Monies spent on drilling could be used to develop solar, wind and tide energy sources. We as a nation are falling behind the world by pursuing limited fossil fuels .

Thank You

Nancy Paddock
