Please accept my testimony in strong support of lease sales in the coastal plain of ANWR. For many years I have been an ardent supporter of opening ANWR to oil and gas exploration and development as a part of Alaska's and the United State's national security and welfare. To keep our nation safe and independent, we must have reliable energy sources that are not tied to any foreign imports. Opening ANWR for development will help to insure our national security. Thank you for recording my testimony on the "Open ANWR" side of the issue.

Gail Phillips
