The Artic Refuge is no place for oil and gas drilling. As human life is encroaching on the limited space on this planet, the quality of life deteriorates. It does not matter if the areas are remote or uninhabitable, all areas have an overall impact on the environment. The is one of the few remaining pristine areas and should be left to the wildlife. As we move away from fossil fuels, it really is not necessary to destroy the environment to drill for more. Save this area!!!!
