Greetings BLM,

And thank you for the opportunity to comment.

I could not be more opposed to opening of the Arctic Refuge's coastal plain for roads and drilling. This is such an important area to caribou, to those who rely on the caribou, denning polar bears, and a symbol of our dwindling wild lands. I've been to NW Alaska but never to this area, but have a pretty good idea of how special and important it is. It is of great comfort simply knowing it's there, left in its' pristine existence. Please don't allow this.

Thank you.
