The Bureau of Land Management,

I agree Sally Jewel's assessment of the proposed development of the Arctic Refuge. There is no justification for the raping of this pristine area. Scientists will tell you there is no assured way of protecting and replacing this environment. It will simply disappear. The Bureau is already planning to decrease the size of a National Park in Utah for mining etc. Again, when depleted it cannot be replaced.

Leave something for future generations to learn about and respect.

Sincerely,
Dialine Petersen
