I am writing to thoroughly oppose drilling in the ANWR. Your scoping documents ask for alternatives to this project; I have several: solar, wind, and not the least of which, conservation!! If we have smaller cars and more efficient heating, cooling, transport, etc, we will have no need for this drilling. This refuge is home to our country's heritage of wild lands, animals and native peoples. 2000 acres of drilling, scattered over the refuge, will change the land and its wildness forever. Moreover, to have this drilling added to the Tax Act, is bad policy...drilling for oil is not part of tax reform.

thank you,
