We strongly oppose any drilling for oil or gas or any leases to drill in the coastal plain of ANWR. We have opposed such drilling for over 30 years.

There has never been a time when we have had such an oversupply of natural gas and oil in our country, and there is no need for this drilling now or in the near future. With climate change, we need to transition to renewable energy sources. The military and most businesses are currently planning ways to address climate change, and the BLM should do likewise.

This coastal plain is an incredible resource for wildlife and migratory birds and clean rivers are essential to fish production and marine mammals. We need to protect it, not destroy it. It is irreplaceable.
