I urge you not to approve of proposed drilling for fossil fuel in this refuge. This area is incredibly important to myriads of birds, animals, plants that are found nowhere else. We must keep our public refuge lands! Selling them for a profit is looking merely at short-term gain. This refuge is not the only place drilling can happen - not that I'm in favor of doing it at all - but there are chices that can be made. Don't sell this one. Thank you, Amy Raven
