Hello, Nicole.

I just wanted to send a quick note letting you know I **oppose** opening up ANY portion of the Arctic National Wildlife Refuge in Alaska to drilling or resource extraction of any kind.

We need to find clean energy alternatives that don't impact our water, air, fish and wildlife, subsistence and migration areas for caribou and the culture of the region. Not to mention protecting wilderness for future generations and lessening our impact on climate change.

The ANWR is a national treasure. More time should be allowed for all U.S. citizens to have the opportunity to comment. Please extend your comment period an additional 120 days.

Please also ensure that the EIS includes Indigenous traditional science as well as the scientific studies, AND translate them into a language accessible by all impacted peoples and have translators present at the public hearings.

Thank you for your time and careful consideration of public opinion and for trying to consider the impact on our future generations before proceeding... it is a heavy responsibility you steward.

Regards,
Bob
