I will never understand the determination of this "administration" to destroy National WILDLIFE REFUGES. It is DISGUSTING. These places are set aside for the purpose of supporting wildlife by providing intact habitat. You cannot have intact habitat with petroleum exploration and drilling occurring. Please get out a dictionary and look up the word "REFUGE." Get out of the pockets of energy corporations and protect our natural resources. Officials promoting this plan....YOU are corporate bootlickers and in no way are leading this nation anywhere but into a polluted mess devoid of biodiversity.
