To whom it may concern:

I am writing in opposition to the Coastal Plain Oil and Gas Leasing Program.

Carbon burning induced climate change makes a transition to other energy sources mandatory. Why prolong the inevitable and ruin the environment in the meantime. It's time to switch to alternative energy solutions.

Our children and grandchildren and all future generations will thank us for having the courage and foresight to save one of the last frontiers. I have just returned from a 10 day backpacking trip into the refuge. It's a National Treasure. Please don't let greed destroy it.
