NO!

Protect this land! Do not forget that it is your duty and mine as human beings to protect our Earth-- oil is on it's way out, clean energy is in. The pipes round Standing Rock have ALREADY leaked-- oil spills cause lifetimes of detriment to our ecosystem-- we have seen land and it's ecosystems die over and over again.

Stand up for what is right. Protect this sacred land.

All land is sacred- someday we may remember this, and when we do, we will wonder how we could have ever been so selfish and thought that we would benefit.
