I urge the BLM to NOT allow oil and gas drilling to take place in the ANWR. While a possibility exists that such could be done without impacting the environment and the wildlife living there, all past evidence and experience shows that that would be a very slim and expensive possibility. If those that are pushing for opening ANWR to oil and gas drilling are wrong in doing so, then it will be too late for the land, wildlife and native peoples. Once it is spoiled or gone, it's gone forever. None of our skills or good intentions will be able to repair the damage. Arctic wildlife are impacted now or will be in the near future from the effects of global warming. Adding the stress of the impacts from drilling for oil and gas could very well tip the balance towards their extinction. Please save the land, wildlife and native peoples of ANWR and reject gas and oil drilling.
