We should NOT open oil drilling in the National Arctic Refuge. This is a WILDLIFE REFUGE. The people, animals, and environment of Alaska are under terrible strain already due to the warming climate. They don't need another source of disruption and possible destruction. We don't need oil from Alaska. There are plenty of wells in the US that have been closed down due to surplus of oil.

Why the RUSH. It smells of politics NOT good stewardship: get those wells pumping before the 2020 Presidential Election so Trump can invigorate his anti-environmental base. And reward his international cronies (like Putin) with a lucrative oil deal. It's a good bet that if the drilling is opened up, it will be a foreign oil company that gets the bid.

Sincerely,

Jamsie Treppendahl
