Dear Nicole Hayes,

The proposal for drilling in ANWAR is asinine. The public has been fighting and speaking out against drilling in ANWAR for decades now. It is a boring conversation that can only ever go back to oil interests being considered greater than the public, who OWN THE LAND, and the scientific and historical and cultural value of the refuge. Shame on everyone involved in facilitating or enabling this in any way. What an embarrassment to our nation--something that will be pointed out as an example of greed and shortsightedness in our nation's history.

DO NOT SELL OFF the Arctic National Refuge!!

Suzanne Walther
