Please accept this email as my formal statement opposing Coastal Plain Oil and Gas leasing program EIS 222. This lease sale is not necessary and needs to be cancelled immediately. Leasing this land will result irreparable damage to Anwar, the animals that roam there and to mother earth. It will worsen climate change and cause horrible things to happen to the caribou and other animals that live up there. We do not need this oil for national security. The USA has plenty of oil. More important, for national security, we need to be shifting our efforts to using renewable energy sources instead of burning fossil fuel. Instead of opening leases, I urge the interior to protect this land for ever.

Thanks for accepting my comment
