I implore you not to allow the leasing process that would allow auctioning off any acreage in America's last truly wild place. The industry has a surplus of oil and gas leases and permits already. Congress has had decades of bipartisan efforts to protect the Arctic Refuge. This is not Alaska's refuge, it is America's and the earth's refuge.

Do not trade away our country's environmental future. If not for us citizens, protect the Arctic Refuge for your children, grandchildren and all your generations to come. We are a better nation than this.

Sincerely,
Diane Wheeler
Seattle, WA
