Dear Bureau of Land Management,

There must be no development of an oil and gas program in the Arctic National Wildlife Refuge until the Department of the Interior has closely examined the science and understands the impacts at every stage of energy development on the Refuge's wildlife, water, subsistence, and other values for which it was created.

The long-term conservation of a critical holistic Arctic ecosystem in the U.S. will be significantly jeopardized by rushing into the proposed abbreviated timeline for a oil and gas program in the Refuge.

Sincerely,
Sylvia Willis
