Dear Reader,

I, along with millions of Americans, are concerned about safeguarding the future of the ANWR. Opening this fragile environment to oil and gas development would be a serious miscalculation of Big Oil's ability to safely extract these resources.

* Oil spills happen everywhere, all the time, as Big Oil's record amply illustrates. Spills here would cause irreparable damage.

* Oil and gas are NOT our future; clean energy must be. Climate cannot be wished away.

This refuge must be protected, not exploited. Please do your job and protect it.

Thank you.

Debra J Wolf
