Dear Administrators: I am writing to ask that you do not move in the directions of drilling the in the ANWR. The need for development in this area is not necessary at this moment as the nation and the world is experience a glut of oil and gas derived from other areas in the United States. I benefit from fossil fuel development in the US as someone who drives a car, wears synthetic fabric and uses other kinds of fabrics made of fossil fuels. I do believe that we need to find a more sustainable way to fuel our country and the world but the need to develop ANWAR is the wrong move at this time. Thanks for your consideration. Best, Robin Westby 206/861-6957 Seattle, WA
