Ryan Zinke,

Please reject the proposals to allow oil and gas drilling on the coastal plain of the Arctic National Wildlife Refuge.

Besides the inevitable climate impact problem everywhere of burning a lot more oil and gas anywhere, specific realities make Arctic coastal plain oil and gas LEAST desirable to be extracted.

Drilling and extraction in the Refuge's coastal plain would have devastating and permanent impacts on the refuge's unique and irreplaceable wildlife, as well as the Gwich'in people who rely upon its caribou herd.

Allowing and promoting such drilling makes no more sense than allowing and promoting bonfires for Internet-era communications.

Please reject this utterly misguided proposal and its underlying wacko view of economic and environmental realities.

Joseph Weinstein
