I am writing to vehemently oppose any legislation allowing oil or gas drilling in the Arctic National Wildlife Refuge. I do not agree with claims that drilling and excavation can be done safely without impact. The area where development would take place is home to caribou, polar bears and many species of wild birds whose habitats will be ruined. Drilling and the necessary infrastructure of roads and utilities will cause irrevocable harm to the environment of this pristine and sacred area, one of America's last truly wild areas. Please do not allow this natural treasure to be lost forever.

Marcia R. Binney
