We have spent many a month from the Brookes Range up to the coastal plain-including ANWAR and the Petroleum Reserve. These are incredible mostly intact habitats unlike any other found in the US and Canada. In a world where habitat destruction is moving at a frightening pace-species are in rapid decline-why would anyone with half a concious even consider causing irreparable damage "JUST FOR THE MONEY" ?? Oil isn't everything, our planet is. Why destroy some of our last best wild areas so that some company can make money off of land that belongs to all of us. As we have seen time and time again once the damage is done it will never be the same.

We support the "Arctic Cultural and Coastal Plain Protection Act" -and keep our wildlife refuges simply that-REFUGES-not money making schemes
