Please consider thoughtfully and with your heart as you begin these discussions. I can only feel that this is being presented by a 'Big Business President' who sees dollars signs at every turn. We know that once we disturb virgin soil, it will never be the same again. In our hearts we know that one single lease will domino like a roaring train through this area. Although jobs and resources are imperative to our survival, the survival of many others including First Nations people and the indigenous wildlife has to be held in the highest regard and with deep considerations before allowing this to begin. Think twice before approving, as your names will be attached in history as the people who instituted this process. In the end, is this what you want your legacy to be? Britte Gogal
