This email is to request that drilling for oil and gas in the Arctic National Wildlife Refuge be prohibited. This is one of the last truly wild places on earth and it should be protected for our children and future generations. Opening this area to oil and gas drilling, no matter what precautions are taken to preserve its beauty and natural state, will harm the area in such a way that it will never be able to return to its pristine state. This is one of the last places on earth where people can visit to experience the grandeur and beauty and wildness of nature. Please let it remain untouched.

Sincerely,

Cindy Buchanan
