Dear Bureau of Land Managment,

I beg you to oppose the development of the above because of the extreme sensitivity of the area, the tundra, the animals already under threat. We need to preserve the place because of its necessity to the wildlife, its water, air and human needs.

Once destroyed, it will be gone forever or at least for thousands of years.

Please don't undo what nature has done for this region and the entire planet.

Sincerely,

Laurine Blankenau

Omaha, NE 68112
