Dear Friends:

I am writing today to express my opposition to any development in ANWR. I feel the coastal plain is a critical area for the Porcupine caribou herd and any development in the 1002 area will have a significant impact on the herd. This is the only area the caribou have for breeding and they have no other place to go if development occurs. Finally, there is the issue of greed. Essentially the entire north coast of Alaska is open for development. Surely, we can set aside one place where no development will occur.

Thank You.

Tim Brabets
