I want to express my displeasure at what appears to be a lack of caring regarding one of the last known UNTOUCHED areas.

This LACK of caring that seems to be prevalent in this administration. Shows in the LACK of regard for everything other than profit and greed and corruption and SELL OUT.

Sell out has a bad ring and makes one feel that no amount of voice on the matter of the Arctic National Refuge will change the minds of those willing to desicrate and trample on indigenous rights and the hearts and minds of the American people.

Make no MISTAKE this will END badly and ALL involved will have no EXCUSE for what happens next.
