Just because you can doesn't mean you should, it's not necessary, especially with other non-carbon producing sources of energy today. Why disrupt/ruin nature's preserves, why must man ruin all the earth's pristine natural world for the sake of making someone rich? Stop the drilling before the damage is done. Let's not wait for a horrendous disaster that we know is inevitable and that cannot be restored without lifelong damaging effects. Please do not permit this travesty!
