

To the Bureau of Land Management,

I strongly oppose oil drilling  
on the coastline of the Arctic  
National Wildlife Refuge. This area  
is an extremely sensitive ecosystem  
that has the greatest diversity of  
any protected area above the Arctic  
Circle. Solar energy, wind energy  
and all the renewable energy sources  
provide clean energy that doesn't destroy our  
wildlife and human environments.

Sincerely, Margaret Zekel 1123 East Cliff Dr. <sup>Santa Cruz</sup>  
95062-2614 Apt. C
