**Comments:**

I would like to respectfully oppose any leasing prospects to oil/gas industry in ANWR. As a resident of this beautiful state, a concerned citizen, an environmentalist, I am concerned that there is consideration to lease one of the last pristine environment on earth. Here are some of the few reasons I completely oppose with FACTS potential leasing:

\* Oil/gas development is not and will never be sustainable and without impact. A leak will happen. It's just a matter of time. Why don't we start thinking about providing a better future to our children, wildlife, people and environment. Impacts will be destructive.

\* It doesn't provide jobs to locals. Look at Prudhoe Bay.

\* There is no water to sustain oil operations.

(Continue comments on the back if needed)

\* The footprint will be much bigger than what it is said: ice roads, etc are NOT included in the footprint. The oil

representants are claiming.

- \* Public and rightful access to locals won't even be possible
- \* Climate change is a fact, not a belief. It shouldn't be a political agenda made to discredit scientists and denial by the current administration is an insult to human kind and wild life. We can't afford carbon, birds, bears, plants, can't afford any more damage and development by oil and gas promising big \$\$.
- \* Oil industries should be taxed! Maybe there will be a little more consideration before drilling.
- \* I could go on and on. I let you all to listen to your heart and turn away from birds and the fake promise for more jobs and more money. No \$\$ can replace a forever damage environment.

Thank you.

Sincerely,

Faustine Bernadine
