I am very opposed to the plan to issues leases to drill for oil and gas in The Arctic National Wildlife Refuge.

The United States currently has a surplus on hand and untapped resources without destroying this unique and irreplaceable area with its economic and cultural values to native communities. The US Fish and Wildlife Service study concluded that drilling there could not be conducted without concomitant and irreversable damage from spills and infrastructure.

Please do not despoil it for the profit of a few.

Yours truly,

Mrs. Robert H. Ferber
