Dear Coastal Plain Oil and Gas Lease

Please don't allow drilling in the Arctic Refuge. Can't we as people do the right thing for this wonderful and pristine environment and all the animals that call it home.

Leave it alone in all its glory. Let it exist as mother nature intended. I have not seen it in person, but I have been awed by the pictures. It is a truly beautiful place that should be preserved for future generations to experience and be awed as well.

Do we need the oil that might be produced there. No!!! We have enough. We need to concentrate our efforts on renewable sources of energy. I'm truly sickened that this vast area will be destroyed and forever marred ~ for something that we have already a surplus and other places to drill that have already been touched by oil and

gas companies.

STOP the madness!!!

Sue Flint

A citizen who would like to leave this world a better place for future generations, but who has little hope that this will happen. I'm so sad for our world!!!

People are cruel!!!
