Please accept this written comment on the plan to drill for oil in the Arctic National Wildlife Refuge. The process is being (illegally?) rushed.

In 2015 the U.S. Fish & Wildlife Service concluded, based on a multiyear review, that the infrastructure (including the web of roads and other infrastructure) would cause irrevocable damage to one of the most sensitive and pristine places on our earth.

This drilling would give away the future of our children and grandchildren by, among other things, releasing more greenhouse gases into the atmosphere. This proposed action is being based on politics not science! Please do not allow this drilling to occur.

Sincerely,
Mary Kate Holder
