To ANWR?

It is so very painful for so many of us Alaskans to witness the justification that you all live with for your continuing to promote drilling in one of the remaining healthy wilderness areas where the organic life force has been so beautifully balanced for so very many years supporting the precious lives and balance which supports our polar bears, salmon and multi other sacred life forms.

Have you no guilt for putting yourself in the role of killers? - killers? - killers?

Please vote to save
our precious wilderness.
