Comments: My name is Mary Ann Rudy. I represent myself, Sierra Club, & millions of others. We/I care deeply about protecting this beautiful and precious planet Earth, our only home! Fossil fuels are killing it!

① Raised by a science-teacher/naturalist-father, and
② raising my three children w/ camping trips in national parks nationwide, and
③ acting to save our fragile environment since the first Earth Day in the 70s. I care deeply. In the 70s, already we knew our human impacts on Earth's climate -- the first evidence = the hole in the ozone layer. That danger is now being reduced by international effort. So there is hope, if we act now!

When I first heard Arctic ice was melting, I grieved for our planet; then, I heard oil companies couldn't wait to drill there. DUSA. Further Development of Fossil Fuels is insane! We must use only clean energy!

I come as one, but I stand for millions in the United States and Canada who want the Arctic Wildlife Refuge protected, not exploited. (Continue comments on the back if needed)
Not more drilling for more life-killing fossil fuels. Will you protect our planet Earth? Thank you!
needless?
