To Whom it May Concern:

There are no actual reasons to drill in the Arctic Refuge. Scrutiny of this reveals oil and gas companies have huge surplus amounts of both of these on hand. According to experts, less than half of federal acreage under leases are in production. Another fact is that fracking has unlocked numerous resources providing the U.S. with less foreign oil dependence.

It was disgusting the way Lisa Murkowski used the tax bill to slip the Arctic Refuge Proposal into it. The refuge is full of wild life that will be impacted by the drilling. The claim that "safe drilling" can be done is absolutely not true. 200 species of birds

Golden bears, Caribou will be  
hurt by this careless proposal.

Bills are inevitable, as well as  
roads, infrastructures affecting very  
sensitive areas

Please I beg you to reconsider  
this terrible option. Why is it that  
we the American people are not  
having a voice in this matter.  
When wild places are injured,  
all America will suffer.

Thank you for reading this  
and giving my feelings / facts to  
weigh on the outcome
