I am opposed to drilling on the coastal plain of the Arctic National Refuge. The fact that we have to convince others that one of the few natural lands left of this supposedly great country is worth more than a few drops of oil is despicable in itself. We have seen what oil drilling does, yet disasters like Deepwater Horizon are met with shock for a few days & then swept out of the limelight. The only sure-proof way of preventing another oil spill, of stopping the destruction of the land our forefathers gave their lives to protect is to not drill. Stop repeating history, start making change.
