I just want to express my dismay over the proposed oil/gas leasing in ANWR. This seems politically motivated rather than any sort of rational economic based incentive. It was pushed into a completely unrelated bill by Sen Murkowski. Who wins. The oil companies aren't terribly interested in developing it. It just stays on the development books to keep the shareholders happy. The Gwich'in — the people who actually live there — oppose it. The coastal plain is the most biologically important part of the refuge.

Management shouldn't be dictated by politics. That's what's happening here.

Find an alternative.
