Almost daily I read in the Seattle Times that the Trump Administration is trying to undo protections to our public lands that were put in place by previous administrations.

I am the widow of a dedicated Federal employee whose career was with the FDA. He was a staunch environmentalist and would be appalled to know the direction this administration is taking us in and what is happening to the Federal agencies.

I urge the BLM not to allow oil and gas drilling in the Arctic National Wildlife Refuge, which is America's last truly wild place. My husband would be proud of you!

Sincerely,

Helena Bunker
