Dear sir or madame,

The Department of the Interior needs to consider the impacts from all stages of oil and gas development, including seismic activities, leasing, exploration drilling, and development, as well as any related infrastructure or other activities. The environmental impacts from oil and gas will extend well beyond the footprint of any actual developments, and will harm the wildlife, water, subsistence, and other values the Arctic National Wildlife Refuge was set aside to protect. Please do not allow plans to drill in the arctic to move forward.
