Dear BLM,

We cannot afford the monumentally destructive effects of this giveaway to the oil companies. For their shareholder's benefit the marine and land habitat will be destroyed for all time. Fisheries will be decimated. The land /sea interface will be desecrated by leaks which are unavoidable. These losses cannot be put back as they were before and the losses will be monumental. You must deny the permits for this sale of our pristine Alaskan marine/land property. This belongs to all of us and should be maintain in pristine condition for the future generations of America's people to enjoy the use of, not the oil companies. We owe it to ourselves to protect the environment and it's inhabitants, human, animal and vegetable from the exploitive destruction of our international oil monopolies. Please act responsibly for all our sakes.

Yours Truly, Sherry Cosgrove
Keeler, CA 93530
