**Re: Comments on the Notice of Intent to Prepare an Environmental Impact Statement for
the Coastal Plain Oil and Gas Leasing Program, Alaska**

Dear Ms. Hayes:

This process has been significantly narrowed and expedited in a troubling fashion as all request for an extension, or more hearings have all been denied. It is painfully clear that securing oil & gas development in the 1002 lands is the only outcome Alaskan leadership will consider. This EIS should encompass how it will promote protection of these lands during the calving season as well as holding multiple studies on the affects of infrastructure on the caribou's routes, habitat, and foods. The EIS should reflect how a one-year compared to the regular time of 5 years will affect it's integrity as well. Both the BLM & the DOI have an obligation both by their own policy and by law to consult and foster government to government dialogue as well as with Federally recognised Indians.

Sincerely,
